

CSK UNFILTERED

Reimagining Fan Engagement Through Gen Z-Led Sports Entertainment

Project Type

Fan Engagement Strategy | Digital Content Series | Sports Marketing Concept

Executive Summary

As sports consumption habits evolve, younger audiences are increasingly drawn toward personality-driven, short-form content rather than traditional interviews and match analysis alone.

CSK Unfiltered is a fan engagement content series designed to bridge the gap between Chennai Super Kings players and the next generation of cricket fans through Gen Z-led entertainment content.

The concept introduces two recurring Gen Z hosts who become the face of the series. Through challenges, conversations, fan interactions, and cultural experiences, they help reveal the personalities behind the players while creating highly shareable digital content.

The goal is simple:

Transform players from athletes into relatable personalities and transform fans from viewers into participants.

The Opportunity

Modern fans don't just follow teams.

They follow stories.

They follow personalities.

They follow moments.

While most franchise content focuses on cricket performance, there is a growing opportunity to create content that showcases the human side of players and strengthens emotional connections with younger audiences.

CSK Unfiltered aims to fill that gap.

The Core Concept

The series is hosted by two Gen Z creators (one male and one female) who act as the audience's representatives.

Rather than conducting formal interviews, the hosts interact with players through entertaining, fast-paced formats that encourage spontaneity and authenticity.

This creates a more relaxed environment where players can express their personalities naturally.
